EDUCATION

Bachelor of Technology in Computer Science and Engineering (AI & ML)
Jawaharlal Nehru Technological University, Hyderabad

2023-27
CGPA: 8.21

Personal Projects

• **TrustRAG – Enterprise Document Intelligence Assistant (Ongoing)**

Developed a trust-focused RAG system for enterprise document Q&A, adding claim-level verification, contradiction detection, and knowledge-gap detection to reduce hallucination and low-confidence answers.

- Built claim-level verification to validate answers against retrieved source passages.
- Implemented contradiction detection across retrieved documents.
- Designed a knowledge-gap detector to flag low-confidence or unsupported queries.
- Built scalable pipelines for processing multi-format documents including pdf, docx, pptx, xlsx, html, and images.
- Benchmarked retrieval and generation quality using RAGAS metrics.
- Built full-stack app with FastAPI backend and React frontend.
- Technology Used: LangChain, LlamaIndex, ChromaDB, Pinecone, FastAPI, React, RAGAS

• **Breast Cancer Prediction System**

Developed an ML-powered healthcare application using Scikitlearn and Streamlit.

- Built an interactive dashboard for real-time tumor classification (Benign/Malignant).
- Achieved 96.48% classification accuracy in distinguishing benign from malignant tumors using a Scikit-learn model.
- Deployed the application on Streamlit Cloud for public access.
- Technology Used: React.js, Node.js, Python, Machine Learning

Live Demo: <https://cancer-classification-kaushik1707.streamlit.app/>

GitHub: <https://github.com/KrishnaKaushik1707/Breast-CancerClassification>

• **Surge Pricing Engine**

Built an ML-powered dynamic pricing engine that predicts realtime price multipliers based on demand, weather, time, and location data.

- Compared 5 regression models using RandomizedSearchCV with cross-validation, achieving R^2 of 0.89 with Gradient Boosting.
- Built and deployed an interactive Streamlit dashboard with live weather API integration and dynamic pricing visualization.
- Technology Used : Python, Scikit-learn, Streamlit, Pandas, OpenWeatherMap API

Live Demo: <https://surge-pricing-kaushik1707.streamlit.app/>

GitHub: https://github.com/KrishnaKaushik1707/surge_pricing_engine

Experience

Machine Learning Intern | Cognifyz IT Solutions Pvt. Ltd.

Jul 2026 – Aug 2026

- Performed data cleaning, preprocessing, exploratory data analysis, and feature engineering on a restaurant dataset containing 9,551 records.
- Developed a Restaurant Rating Prediction model using Linear Regression, Decision Tree, and Random Forest, achieving an R^2 score of 0.961 with Random Forest.
- Built a restaurant recommendation system using TF-IDF and cosine similarity based on cuisine, location, price, and restaurant services.
- Implemented a Cuisine Classification model using Logistic Regression and Random Forest to classify restaurants across five major cuisine categories.
- Technology Used : Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TF-IDF, Cosine Similarity

Technical Skills

Languages: C/C++, Python, Java, JavaScript, SQL

Frameworks and Libraries: FastAPI, React, Pandas, Matplotlib, NumPy, PyTorch, LangChain, scikit-learn

Tools and Technologies: VS/VScode, Git, Github, Docker, AWS, Postman

Relevant Coursework: Operating Systems, Object-Oriented Programming, Database Management System, Computer Networks, Data Engineering & Exploratory Data Analysis (EDA), Machine Learning, Deep Learning, Neural Networks, Computer Vision, Natural Language Processing and Artificial Intelligence.

SoftSkills: ProblemSolving, Self-learning, Team Collaboration, Analytical Thinking.

Achievements

Bajaj Finserv hackathon HaCRx 6.0 finalist

August 2025
